Models of set theory in which separation theorem fails

V. G. Kanovei*, V. A. Lyubetskii

Received: 28.05.2019**Revised:** 21.07.2020**Status:** Accepted**Pages:** 45

Abstract: We make use of a finite support product of the Jensen minimal forcing to define a model of set theory in which the separation theorem fails for projective classes Σ_n^1 and Π_n^1 , for a given $n \geq 3$.
